EDUCATION

Technical University of Munich Oct 2022 – Sep 2025
M.Sc. Informatics *Munich, Germany*
Thesis: *Guidewire Tracking in X-ray Fluoroscopy under Sim-to-Real Domain Shift*: Chair for Computer Aided Medical Procedures & German Heart Centre

Bilkent University Sep 2017 – Jun 2022
B.Sc. Computer Science: Wide Impact Award, Bilkent CS Fair 2022 *Ankara, Turkey*

WORK EXPERIENCE

Taico.io Apr 2024 – Apr 2026
Full-Stack Software Engineer *Munich, Germany*

- Architected and deployed scalable **Dockerized** backend **APIs** using **Python/Flask** and **JavaScript/React** dashboards for an enterprise media transparency platform; integrated **Grafana** for enhanced observability.
- Processed 1M+ row datasets on **GCP (BigQuery, Cloud SQL, Cloud Run)**; redesigned data extraction pipelines for a **20× speedup** with automated execution; built **CI/CD** pipelines via **GitHub Actions**.
- Contributed to an AI analytics product leveraging **LLM APIs** and **RAG**, enabling clients to explore and interpret their media datasets.
- Interfaced directly with **enterprise clients** to gather business needs, translating them into technical solutions.
- Promoted from Working Student to Full-Stack SWE; accelerated feature delivery leveraging **Claude Code**.

QYOBO Jun 2023 – Jan 2024
Working Student: Data Engineering *Munich, Germany*

- Built **Python/Scrapy** based ETL pipelines for pharmaceutical market data; owned end-to-end extraction and ingestion into **PostgreSQL** databases to power competitive intelligence dashboards.

Miraclepass Jul 2021 – Mar 2022
Founding Engineer *Ankara, Turkey*

- Co-founded a QR-based mobile payment startup; integrated **payment APIs** and built the MVP in 6 months using **React Native** and **PHP** in a 3-person team to enable seamless in-person transactions.

PROJECTS

Alibi: Multi-Agent Detective Mystery Game *Personal Project*

- Developed an interactive murder mystery game where players interrogate autonomous, memory-backed suspect **AI agents** coordinated by a central supervisor and **RAG**-based game state.
- **Tech Stack:** Python, FastAPI, LangGraph, LangChain, AWS Bedrock, ChromaDB, Pydantic, Streamlit

Parma AI *In Collaboration with La Famiglia VC*

- Collaborated in a team to build an internal venture intelligence platform for La Famiglia VC, aggregating market news and generating automated investment reports to streamline deal sourcing workflows.
- **Tech Stack:** Python, FastAPI, OpenAI API, MongoDB, Docker, GCP, Pydantic, pytest

reporTown *Senior Design Project*

- In a team of 5, developed a civic engagement mobile application enabling citizens to report and automatically categorize urban infrastructure issues; won **Wide Impact Award** among 40 teams.
- **Tech Stack:** Java, Spring Boot, React Native, YOLO, AWS Lambda, S3, EC2

SKILLS

Programming Languages	Python, Java, JavaScript, TypeScript, SQL
Frameworks & Libraries	FastAPI, Flask, React, Spring Boot, Scrapy, Pydantic, SQLAlchemy
AI & ML	LangGraph, LangChain, RAG, ChromaDB, LLM APIs, PyTorch
Cloud & Infrastructure	GCP, AWS, Docker, PostgreSQL, MongoDB, CI/CD, Git, Linux
